Authorized distributor

JEIL MTECH CO.,LTD

IS THE LEADING MANUFACTURER OF INDUSTRIAL MARKING FIELD IN THE REPUBLIC OF KOREA

We JEIL MTECH have been engaged in manufacturing CNC pin marking system Marksman series since 1989. We provide you most of marking solutions with our own manufactured machines and devices based on long term skill.

RESERACH & DEVELOPMENT

With the confidence that the only way to get customer reliability is dependent upon the constant research and development. JEIL MTECH devotes itself to technology research at its R&D Facility Center. It's accumulated and well-managed technology bring to supply high quality and cost-effective system through developing new items.

MASS-PRODUCTION & QUALITY CONTROL

We offer our products under the high quality & low cost in timely manner through the mass-production system. JEIL MTECH is certified for ISO9001, ISO14001 and many kinds of domestic certificate which are being proof of best technology and well-constructed quality control system.

COMPANY IN MOTION

To be based on our tradition of several decades on factory automation field, we also have been engaged in manufactruing motion control system. JEIL MTEH offers the wide range of motion control products, especially stepping motors & its control system. Continued sales growth has resulted from the reliable technology and friendly service to the world wide customers. So from now on, JEIL MTECH ranks among the leading manufacturers of this field in the world.

Do not hesitate to ask any questions!

MARKING HEAD

"Choose any-head for your own application(s)!"

- A made by "Cast Aluminum" for protect from out side impact, Reduce noise and long lifetime without vending or damage and a made by steel case for more light, variable and easy installing to customer(s) own systems.

MCU CONTROLLER

MAJOR FEATURE

- The MCU will support an any kinds of marking solution
- Most important function can be operate with PC or without PC through RS-232 cable using our won softwares.
- Able to communicate with all kinds of PLC through I/O port.
- An use SD-card or RS-232 cable to upload and down load data.
- Easy select to LP/PH system(Patient pin system).
- A linear, circular, oblique-line, angle and circumference marking(with CDC-20)
- Automatic serialization, data coding, Julian Calendar, special date coding, day & night coding and etc..
- Single block & Multi blocks data, Auto CAD PLT file and special logo marking.
- 2D-matrix and Bar-code marking
